

## **Bhutan Photo Archive README**

In June, 2015 I bought an Epson Perfection V800 slide scanner, to replace my Canon Canoscan LiDE 700F, for which the slide scanner gadget was no longer functional.

All slides scanned from 17/6/15 onwards have been scanned on the Epson V800.

I am now re-scanning Bhutan slides which I had already processed with the CanoScan in past years, since the Epson, as well as being quick and easy to use, gives a much better result. At the same time, I am reviewing **all** colour slides taken in Bhutan since my first visit in early 1980, and selecting more for scanning for this archive.

This folder contains all the NEW scans made to date (17/2/2016).

Details fields have been completed as follows:

**Comments:** Epson Perfection V800 scan

**Authors:** Felicity Shaw

**Date taken:** [as indicated on the slide mount]

**Program name:** Scan editing program, generated automatically as ArcSoft PhotoStudio 6.0

**Camera model:** Pentax K1000 (1980 to end 1998); then Nikon FM10 to Aug. 2001; Pentax MZ50 16/9/01 until transition to digital camera in 2009; selected slides Leica M3-as found noted on the slide mount when I scanned the slide.

**Cameras note:** Scans with date taken prior to 1980 are from slides taken on Asahi Pentax Spotmatic models I and II.

### **Slide film data:**

To 1984: Kodachrome 25

1995-1997: Fujichrome Velvia 50

1998: Fujichrome Sensia 50

1999: Fujichrome Sensia II 100

2000: Fujichrome Sensia & Velvia

2001 & following: Fujichrome Provia 100F

(Very occasional use of Ektachrome or Kodachrome 64, borrowed or purchased when I ran out of film I had brought on tour.)
